SCIENTIFIC LABORATORIES EQUIPMENTS TRADING L.L.C

Introduction

Water Scientific Laboratory Equipments Trading L.L.C offers the most innovative and best quality products for Laboratory Instruments/Equipment's, Glassware, Plasticware, Chemicals, Test Kits, Reagents, Standard Solutions, Balances, Balances, Medical Equipment's and Consumables etc.

The primary goal of Water Scientific Laboratory Equipments Trading L.L.C is **Customer Satisfaction** through the following objectives;

- We guarantee the utmost care in selecting the suppliers and products.
- We guarantee an excellent balance between price and quality.
- We develop a working environment with which we can prevail in the world market.
- We dedicate our skills to Quality and Customer Satisfaction, and continuously update and improve our management technique.

LAB AND PORTABLE INSTRUMENTS

Colorimeters / Photometers

Photometers / Colorimeters are the all-rounders in water analysis which measure the concentration of a substance based on the light that passes through a water sample.

Spectrophotometers

Spectrophotometers work with the entire scope of the light spectrum and as professionals in water analysis, deliver the most accurate measurement results.

SCIENTIFIC LABORATORIES EQUIPMENTS TRADING L.L.C

Turbidity Meters

Continuous monitoring of turbidity is essential for drinking, industrial and process water. Tiny particles present in the water not only cloud the water, they can also cause damage to people and materials.

Electrochemistry Meters

Electrochemical measurement instruments are reliable, fast determination and helpful to industrial wastewater, drinking water, swimming pool water or water used in the food and beverage industry by controlling the parameters like pH, Conductivity, Dissolved Oxygen, Redox & TDS.

Titration Apparatus

Titration is used to determine the concentration of a substance in a solution.
Applications: Water, Food & Beverages, Petrochemical, Moisture Content and Environment.

REAGENTS

SCIENTIFIC LABORATORIES EQUIPMENTS TRADING L.L.C

Reagents are commonly used to test for the presence of certain substances, as the binding of reagents to the substance or other related substances triggers certain reactions. It includes Tablets, Powders & Liquids.

STANDARDS & SOLUTIONS

Standards & Solutions contain a known and accurate amount (i.e. concentration) of a substance or element. These solutions are commonly used to help identify and determine the concentration of a substance whose concentration is unknown.

TEST KITS & STRIPS

Test Kits & Strips offer quick, clean results without the fuss of reagents or tablets. This is the popular choice for many applications where speed and simplicity are most important.

CHEMICALS

Laboratory Chemicals are necessary to perform experimental and/or investigative procedures. We can supply wide range of Lab grade chemicals including Acetic Acid, Acetone, Ammonium Hydroxide, Carbonate, Chloride, Copper, Sulfate etc.

GLASSWARE

BEAKERS

Available in various sizes like
50mL, 100 mL, 150mL, 250mL, 500mL etc.

FLASKS (Conical & Volumetric)

Available in various sizes like
50mL, 100 mL, 150mL, 250mL, 500mL etc.

SCIENTIFIC LABORATORI

BOTTLES

Available in various sizes like
50mL, 100 mL, 150mL, 250mL, 500mL etc.

CYLINDERS

A graduated cylinder or measuring cylinder or mixing cylinder is a common piece of laboratory glassware used to measure the volume of a liquid. Graduated cylinder available in different size from 10mL, 25mL, 50mL, 100mL etc..

BURETTES

A burette is a graduated glass tube with a tap at one end. The flow of liquid from the tube to the burette tip is controlled by the stopcock valve. There are two main types of burette; Volumetric burette and Piston burette or Digital burette.

PETRIDISHES

A Petri dish (alternatively known as a Petri plate or cell-culture dish) is a shallow transparent lidded dish that biologists use to hold growth medium in which cells can be cultured.

SCIENTIFIC LABORATORIES EQUIPMENTS TRADING L.L.C

DESICCATORS

Desiccators are sealable enclosures containing desiccants used for preserving moisture-sensitive items such as cobalt chloride paper for another use. A common use for desiccators is to protect chemicals which are hygroscopic or which react with water from humidity.

PLASTICWARE

BEAKERS

Available in various sizes like
50mL, 100 mL, 150mL, 250mL, 500mL etc.

FLASKS (Conical & Volumetric)

Available in various sizes like
50mL, 100 mL, 150mL, 250mL, 500mL etc.

SCIENTIFIC LABORATORY

BOTTLES

Available in various sizes like
50mL, 100 mL, 150mL, 250mL, 500mL etc.

FUNNELS

Plastic funnels made of non-reactive polyethylene are used for transferring aqueous solutions. There are different kinds of funnels like Filter funnels, thistle funnels and dropping funnels.

RACKS

Test tube racks are laboratory equipment used to hold upright multiple test tubes at the same time. Test tube racks come in a variety of size, composition, material, and color.

VIAL

A vial is a small vessel used for storage. It is used to store medication as liquids, powders or capsules.

SCIENTIFIC LABORATORIES EQUIPMENTS TRADING L.L.C

CENTRIFUGES TUBES

Centrifuge Tubes are available in two standard materials: Polypropylene (PP) and Polyethylene Terephthalate (PET). Polypropylene tubes provide excellent chemical resistance and mechanical strength. They are strong, moderately rigid, and well-suited for most disposable centrifuge.

BALANCES & ACCESSORIES

PRECISION BALANCE

INDUSTRIAL SCALES

TOP LOADING BALANCE

RETAIL SCALES

JEWELLARY BALANCE

ACCESSORIES

ANALYTICAL BALANCE

MICRO BALANCE

MOISTURE ANALYSERS

A moisture analyzer is a device that determines the moisture content with the loss on drying method and consists of a weighing and halogen heating unit.

MICROSCOPES

INVERTED MICROSCOPE

STEREO MICROSCOPE

COMPOUND MICROSCOPE

METRLLURGICAL MICROSCOPE

POLARIZING MICROSCOPE

MEDICAL EQUIPMENTS

HEMATOLOGY ANALYSER
